

### Professional Summary

- **11.10+ years** of IT experience in Software Design, Development of various client/server and web based Enterprise Applications using different tools and technologies.
- Experience in product development **from Scratch, POC's**.
- Expertise in working with **Angular14, HTML, JavaScript, jQuery, and Ajax**.
- Expertise in using **Core Java**.
- Strong Experience in **Java 8, 11, 17** with **Object Oriented Programming Concepts (OOPS)**.
- Working experience of **MVC architecture** with **Spring Boot, Spring 3, Struts 2, Struts 1.x, and JSF**.
- Experience in working with **Micro services, and Rest API Services**
- Experience in unit testing using **Jasmine for UI and Junit for BE**.
- Experience in Cloud Technologies like **AWS, Azure and Open-Shift**.
- Experience in Designing **Single Sign On** using **Azure Active Directory** and **Spring Security** based on **LDAP users**.
- Experience in build tools **Apache Maven, Ant and Gradle** and Deployment tool **Jenkins** and **CI/CD** pipelines.
- Expertise in building **PL/SQL, and SQL queries**
- Experience in **Hibernate ORM Tool and Spring Data JPA**
- Experience Relational Database like **MS SQL Server, PostgreSQL, Oracle, DB2, and My SQL**.
- Working experience as an **Individual Contributor** and following **Agile Scrum** Methodology.
- Working experience in **Enterprise** applications for processing Fraud check out of lakhs of data.
- Experience with **Application Servers** and **Web servers** using **IBM WebSphere, JBoss, and Apache Tomcat**.
- Experience with IDE tools **IntelliJ, Eclipse** and also with **version controls** like **SVN, Git hub, and Microsoft Git**.
- Possess excellent analytical, problem solving, critical thinking, communication and presentation skills, good estimation skills on requirements and adhere to strict deadlines.
- Actively collaborate with the **UP-stream** and **downstream** applications and DB teams for fixing the issues.

### Domains

Banking, Energy, and Pharmaceutical domains.

### Skills

Primary Skills	JAVA 17, Spring, Spring Boot, Angular 6 to 14, Micro-Service, AWS, Azure, and Openshift
Category	JQuery, TypeScript, Javascript, Html, CSS, Java 17, Spring Core, Spring Boot, Spring JDBC Template, Spring JPA, Hibernate, Junit, Sonarqube, JIRA, Optimise the SQL Queries, PL/SQL
Sub Skills	JavaScript, JQuery, and Ajax, Struts 2, JSF, Hibernate, Microservices, MS SQL, PostgreSQL, J-Meter, Oracle, DB2, and My SQL, Git, SVN, Bit bucket, Maven, Ant, IntelliJ, Eclipse, and NetBeans, WebSphere, JBoss, Apache Tomcat, Sun Application Server, Agile and Waterfall

### Projects

Project Profile : Continuous Governance and Confluence, Santander		Technical Analyst
Project Type	Web-based application and Back end Micro Services	
Project Domain	Banking	
Client	Santander	

<b>Duration</b>	Aug 22 to till date	
<b>Location</b>	Hyderabad	
<b>Team Size</b>	Project : 13	Module : 4
<b>Technologies</b>	Java1.17 and 1.8, Spring Boot 3.x.x, Angular14, Micro-Service, NodeJs, Jasmine, JUnit, Maven, Jenkin, Oracle, PostgreSQL, My SQL, Openshift, Confluence Rest API, SQL Queries, and PL/SQL	
<b>Project Overview:</b>	<p>1) Design Web based applications UI Angular and BE Spring Boot with Three Micro Services for Governance Control Centre. It maintains the information flows between agile product teams, change governors and senior decision makers (PIM)</p> <p>2) Design Rest MicroServices for Mortgages business</p> <p>3) Designed Desktop based applications for creating Confluence pages based on excel data and extract files, and Json file from JSON Response.</p>	
<b>Roles &amp; Responsibilities</b>	<ul style="list-style-type: none"> <li>Develop the web-based, rest micro-services and desktop applications using Java17, Spring Boot 3.2.0 and Angular 14</li> <li>Developed <b>Spring Boot</b> Desktop App and DB.</li> <li>Design the <b>MYSQL</b> Database, and <b>PL/SQL</b>.</li> <li>Involved in <b>code review</b>, performance testing, <b>test case for UI and BE</b> etc.</li> <li>Participates in client calls and gathering requirements, prepare documentation, <b>identifying risks, providing alternative solutions, creates POC's</b>, writing <b>J-Unit</b> etc.</li> <li>Participates <b>sprint review calls</b> with clients and explain what we done within the sprint.</li> <li>Interacting with DB team and explain the requirement clearly to handle the data efficiently.</li> <li><b>Mentoring</b> and <b>guiding</b> team</li> </ul>	

Project Profile : Global UI and Service, IHSM		Tech Lead
<b>Project Type</b>	Web application and Rest API (Micro Services)	
<b>Project Domain</b>	Energy	
<b>Client</b>	IHS Markit	
<b>Duration</b>	May 18 to Aug 22	
<b>Location</b>	Hyderabad	
<b>Team Size</b>	Project : 12	Module : 8
<b>Technologies</b>	Angular8 to 11, Java1.8, Spring Boot, Junit, Microservices, Maven, NodeJs, JSF, Docker, MS SQL, PostgreSQL, Denodo, AWS(ECS Fargate, S3 Bucket, CI/CD and Lambda) , Azure Boards, IBM FileNet, Struts2, Rest Services, TeraForms, WebSphere, Apache Tomcat, Python, Azure Git, IntelliJ, Pycharm, DB Grid, J-Meter, JUNIT-Mock, SonarQube, OCR and DBVeawer	
<b>Project Overview:</b>	System maintain <b>Oil &amp; Gas</b> related document and users validate and moved one queue to another queue	

<b>Roles &amp; Responsibilities</b>	<ul style="list-style-type: none"> <li>Develop the Web based applications for the validating and processing the oil and gas doc.</li> <li>Developed <b>Spring Boot</b> Apps and <b>Microservices</b> APIs on Top of AWS <b>S3</b>, <b>APIs</b>, and <b>DB</b>.</li> <li>Design UI apps by using <b>Angular</b> and <b>Python</b> applications and <b>fixing Production issues</b>.</li> <li>Design the <b>MSSQL</b> and <b>PostgreSQL</b> Database, and <b>PL/SQL</b>.</li> <li>Design <b>docker</b> containers for schedulers, apps, and deploy in the <b>AWS ECS and Lambda</b>.</li> <li>Involved in <b>code review</b>, performance testing, deployment, <b>test case</b>, and <b>load testing</b> etc.</li> <li>Participates in client calls and gathering requirements, prepare documentation, <b>identifying risks</b>, <b>providing alternative solutions</b>, <b>creates POC's</b>, integrate <b>J-Meter</b> etc.</li> <li>Implemented <b>Single Sign on</b> using <b>Azure Active Directory</b></li> <li>Designed <b>Spring Security</b> based on <b>LDAP users</b>.</li> <li>Participates <b>sprint review calls</b> with clients and explain what we done within the sprint.</li> <li>Interacting with <b>testing team</b> to <b>explain the requirement</b> clearly and help them in testing the application thoroughly.</li> <li><b>Mentoring</b> and <b>guiding</b> team.</li> <li>Follows complete Agile Methodology.</li> </ul>

Project Profile : STEP and FIA, SunTrust Bank			Application Developer
Project Type	Web application and Soap API		
Project Domain	Banking		
Client	SunTrust Bank, USA		
Duration	Nov 14 to May 18		
Location	Hyderabad		
Team Size	Project : 22	Module : 5	
Technologies	Java, Spring, Spring Boot, Struts2, Hibernate, Angular, Tepstry, JSF, Oracle, DB2, MS SQL, Fortify, Splunk, Jenkins, Jira, Git, Web Services, Maven, Eclipse, WebSphere and Apache Tomcat		
Project Overview:	System receives Suspected Check from Xerox and users are verify account and checks info with different app and proceeds further.		
Roles & Responsibilities	<ul style="list-style-type: none"><li>• Develop the Web application for Check validation Spring, Hibernate and Tepstry framework.</li><li>• Develop the backed <b>scheduler</b> and setup the <b>cron jobs</b> for auto execution.</li><li>• Preparing <b>test case</b> for <b>new changes</b>, <b>production issue fixes</b> and <b>security vulnerabilities</b>.</li><li>• Involved <b>DB changes</b> and Optimised <b>PL/SQL</b> queries.</li><li>• Integrating <b>Web Service</b> for additional account info as part of upgrade application.</li><li>• Working <b>enterprise-level</b> applications like Fraud check to verify with different systems.</li><li>• Monitoring <b>Splunk, Dynatrace</b> Tool for find the performance issues.</li><li>• Participated in technical discussions, requirement gathering and deployment calls.</li><li>• Following Agile and water-fall Methodologies.</li></ul>		

Client : Bloomedha Product for Pharmaceutical Labs		Software Engineer
Project Type	Web application and Soap API Service	
Project Domain	Pharmaceutical	

<b>Client</b>	<b>Life Science and Vimta Labs</b>	
<b>Duration</b>	Jun 11 to Aug 13	
<b>Location</b>	Hyderabad	
<b>Team Size</b>	Project : 12	Module : 4
<b>Technologies</b>	Java, Servlet, Swings, JSP, JDBC, Struts2, Hibernate, Javascript, MYSQL, BIRT, Eclipse, Tomcat, and Sun Application Server	
<b>Role</b>		
<b>Project Overview:</b>	System maintain Voluntaries Info for Pharmaceutical companies.	
<b>Roles &amp; Responsibilities</b>	<ul style="list-style-type: none"> <li>• Developed web application for the pharmaceutical clients.</li> <li>• Involved technical and requirement gathering discussions.</li> <li>• Involved to designed UI, UI validations, Services APIs, and DB changes.</li> <li>• Performing Unit Test and design test-cases.</li> <li>• Design the BIRT-Reports.</li> <li>• Updates the daily status to Superior.</li> </ul>	

### Experience Details

- Currently Working with Coforge as **Technical Analyst** from **Aug'22** to till date.
- Cyient Limited as **Tech Lead** from **May'18** to **Aug'22**
- IBM India as **Application Developer** from **Nov'14** to **May'18**
- Bloomedha Info Solutions as **Software Engineer** from **Jun'11** to **Aug'13**

### Educational Qualifications

- **MCA** from JNTU(H) University – 2010 with **76%**
- **Degree** from Osmania University – 2007 with **71%**
- **Intermediate** from Triveni Junior College, Suryapet – 2004 with **81.6%**
- **High School** from ZPHS, Yandlapally – 2002 with **72%**

### Personal Details

Name	Janaiah Kaatla
Address	New MIG, BHEL, Hyderabad – 502032
